

ZONE CONTROL VALVE

MODEL NO: FK-ZCV/2.5/3/4/6

TECHNICAL DESCRIPTION

Fire King Zone control valves are designed to operate utilizing electrical service for actuation. A sprinkler system must be capable of shut down after the fire has been controlled, and for periodic maintenance and modification. Control valves can provide this function.

In the simplest system a single shut-off valve may be located at the point where the water supply enters the building.

Zone Control Valve is a system designed to separate the area in case of maintenance and to get the indication of fire zone on a combination of Butterfly valve, Flow Switch, Pressure Gauge and Test & Drain Valves.
